

A complete turnkey project for a leading Pigment manufacturing company.

Following a serious flood the brief was to design and install five laboratory areas on a rolling programme to ensure the manufacturing facility was not compromised.

The project comprised;

- Initial Client Feasibility Study and budget estimates.
- Project Management.
- Supply and installation of Fresh Air and Air Conditioning Systems
- Installation of Suspended ceiling and lighting

RockWood Pigments Laboratory Construction project

InterFocus

- Installation of Ceramic Tiled Flooring
- Installation of Fume Cupboards, Nederman and Extraction System.
- Installation of Partitions to create individual laboratory areas.
- Manufacture and Installation of Laboratory Furniture
- Installation of all Mechanical & Electrical Services.
